★ Decrease frequency of outings (including shopping for essential items) by **50** percent.

★ When eating in groups, limit the amount of participants to **4** or less people that you see on a regular basis, and finish such meetings within two hours. This includes outdoor barbeques.

★ Continue to avoid the **3** C's.

★ Refrain from returning to your hometown or taking unessential trips to other Prefectures during holidays. In the case that you must travel to another prefecture, be sure to manage your health for **2** weeks before and after your trip.

★ The use of just **1** mask will protect you as well as your loved ones.

Protect Each Other! Move Closer to **0** Infection Risk!

※ 1 Before the Spread of Infection : Pre-COVID (Before January 2020)

## Rules in Consideration for Others: "Mask Code"

~Protect each other, protect your precious families,  
protect the workers of the prefecture.

Spread that kindness to the workers in the medical field as well~

### ○ When chatting: "masked chatting"

People have a tendency to let their guard down while on break, so be sure to pay extra attention during such times.

Case①

Infections occurring from chats had while in the dressing room or at the smoking area

### ○ When eating: "masked meals"

Only remove your mask when eating or drinking, including outdoor meals.

Case②

Meeting up with 5 friends and their families for a barbecue, resulting in all members getting infected

### ○ Masking up at home

Do this for two weeks in the case that you are residing with family that has visited or has come from areas with high infection rates. Continue this for at least two weeks.

Case③

College students visiting home from areas with high infection rates, resulting in their parents and grandparents getting infected

### ○ The Correct Way to Wear a Mask

Find a mask that firmly fits the shape of your face with out leaving any open spaces. It has been shown that masks made from non-woven materials, such as cloth or urethane, are more effective for disease prevention.
